CO-ORDINATING COMMITTEE

Interpretative Note No. 8: Item 1545

Memorandum by the United Kingdom Delegation

It has been drawn to the attention of the United Kingdom Authorities that an error exists in paragraph 5 of Interpretative Note 8 on I.L.1545 (COCOM Document 4000; Annex B on page 61).

This reads as follows:-

"Where  $F_1$  (the frequency at which the modulus of the current gain in the common emitter connection is equal to 1) is quoted instead of  $F_{\alpha}$   $F_1$  may be regarded as  $1.2 \times F_{\alpha}$ ."

This note was introduced and agreed during the 1959 review (COCOM Document 3715.45/2), but the United Kingdom Technical Advisors have now pointed out that this is technically incorrect and that " $1.2 \times F_{\alpha}$ " should read " $0.8 \times F_{\alpha}$ ".

Her Majesty's Government propose that the item should be amended accordingly and would be grateful for the views of member Governments by October 10.

United Kingdom Delegation,  
Paris.

September 19, 1960.
